#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bryant et al. (3,822,212). Bryant et al. disclose a method of applying antiseptic to an oral appliance comprising providing a liquid antiseptic 15 in a spray dispenser 11, holding the oral appliance 19, spraying the antiseptic on the oral appliance, the antiseptic is applied to the appliance outside of a user's mouth (column 5 line 10, figures 1,2). As to claim 2, the spray dispenser can be single use and disposed when the antiseptic is exhausted. As to claim 3, the antiseptic comprises mouthwash, in that the composition of Bryant et al. comprises known materials found in mouthwash and the specification does not disclose the contents of mouthwash. As to claim 4, the spray dispenser comprises a pump sprayer (column 2 line 43). As to claims 5 and 6, the method includes the steps of removing the appliance from the user's mouth prior to spraying the oral appliance and inserting the appliance into the mouth after spraying. As to claim 7, the oral appliance is a denture 19.

## Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bryant et al. in view of Lerner (3,235,131). Bryant et al. disclose an antiseptic spray dispenser comprising a container made of disposable material, a pump sprayer having a nozzle, the sprayer being disposed in the container, a liquid antiseptic disposed in the container adapted for cleaning an oral appliance, the antiseptic having a volume that can be for a single application and the container can be disposed by the user; however, Bryant et al. does not show a removable cap attached to the container and disposed over the nozzle. It is well known in the art of dispensers to have a cover on the dispenser nozzle for a number of reasons such as to protect against contamination and damage to the nozzle; however, Lerner is applied to show such a teaching. Lerner teaches a removable cap 2 attached to the container 4 and disposed over the nozzle 22. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the dispenser of Bryant et al. to have the cap of Lerner in order to protect against contamination in storage and to shield the nozzle against accidental discharging in view of Lerner.

#### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tauman et al. (3,808,686) and Abbas (2003/0123921) are cited to show the state of the art with respect to an oral antiseptic spray dispenser and method of use.

6. Any inquiry concerning this communication from the examiner should be directed to Melba Bumgarner whose telephone number is 571-272-4709. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached at 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
